San Diego County Public Schools

2008 Academic Performance Index (API) - The API assigns schools a numerical value based on statewide test performance. The number ranges from 200 to 1,000, with 800 as the target for all schools.

Grouping is by school district

Data analysis by Systems Editor Basim Shamiyeh

TARGET: A - Met API target of 800; B - School did not have a valid 2007 API base so no change can be computed; C - School had significant demographic changes. A numerical value in this column means the school needed to improve its API by that amount as a minimum.

CHG: The California Department of Education refers to this as "Growth". It's basically the change from one year to the next. The value in this column is the change from 2007 to 2008. Otherwise, "B" means the school did not have a valid 2007 API base and there is no growth or target information; "C" means the school had significant demographic changes and there is no Growth or Target information.

MET BOTH: A school is required to meet both the API Target and Comparable Improvement Target. This is a "Yes", "No" or "N/A" (not applicable).

Alternative Schools Accountability Model (ASAM) and Special Education schools are excluded from the report prepared by the Union-Tribune and SignOn San Diego.
